

The key to perfecting your practice

shopfitting | project management | design

At JMSF we are experts in the field of health and medical practices.

We have designed and built a substantial number of medical centres across Australia; from solo practitioner practices to thirty room medical centres. Our services include client briefings, centre design, colour schemes, furniture, medical equipment, phone systems, signage and IT.

We have in-house expertise who can complete full Medicare, D of H & A as well as other essential requirements such as phone lines, ADSL, clinical waste, linen suppliers and medical consumables. All our centres are designed to comply with RACGP accreditation standards, local council regulations and the Australian Building code.

Feel confident that our experience and expertise will see your practice achieve its full potential. Contact JMSF today or visit our website at www.jmsf.com.au
